

ERRATA

- 1) In the paper by Willdnson, R, Dutson, G, Sheldon, B, Darjono and Yus Rusila Noor entitled "The avifauna of the Barito Ulu region. Central Kalimantan", in *Kukila* 5 (2): 99-116, Dr. Joe T- Marshall informs us that he was accompanied up the Murung river by Mafudz Markaya, and not by Boeadi as stated on p. 116. In addition to the 17 species listed on p. 116, JTM adds the following species (*in lift. to* DA. Holmes): *Otus bakkamoena*, *Batrachostomus javensis*, *Pelargopsiscapensis*, *Aegithina tiphia*, *Cyornisturcosa*.

Further, in addition to the 1979 record of *Pseudshis davisoni* by JTM at Teluk Jolo, already quoted in Holmes (1991, *Kukila* 5 (2): 145-147), three birds were recorded at the same locality, 18 August 1982.

- 2) In the paper by S. van Balen and A. Lewis entitled "Blue-crowned Hanging Parrot on Java" in *Kukila* 5 (2): 140-141, a paper was published containing sighting records of Blue-crowned Hanging *Parrots Loriculus galgulus* on Java. Partly because of problems with overseas correspondence, the observation of the species in July 1989 was mistakenly attributed to Alan Lewis (AL); this should however be Peter A J. Morris, to whom my sincere apologies, and belated acknowledgments.
- 3) In the paper by K.D. Bishop entitled "New and interesting bird records from Wallacea" in *Kukila* 6 (1), on p. 28, for the sub-heading LALOBO. read LABOBO.

On p. 12, it is incorrectly stated that there are no recent published records of *Sterna hirundo* for Maluku. In fact, Bowler J. & J. Taylor (1989) reported many off the north coast of Seram in September 1987 (*Kukila* 4; 14).
